Innovative wood connection systems for highest requirements.

PIST Metallbau GmbH & Co. KG  
DIN EN 1090-2

## Tool Lifting clamps PowerClamp

# Lifting clamp PowerClamp III 55890.0000

Lifting clamp PowerClamp III D40/90

The lifting clamps - the latest innovation in timber construction.

Enables you easily to raise wooden beams and massive edge glued panels through a simple and quick fastening of the lifting clamps. Depending on the demand the D40/90 is appropriate for a load carrying capacity up to 1500 kg, the D25/70 for a load carrying capacity up to 500 kg. Drill, apply, lift!

Advantages of PowerClamp

- Major time savings
- No other lifting gear needed
- No damage of wood surface
- No soiling
- RFID-Transponder for digital recording and theft protection (D40/90)

Scope of supply

- 2x PowerClamp (D40/90)
- 1x Drill (40 mm)
- 1x High quality transport box

The low-maintenance lifting clamp is your optimal partner for each construction project. Despite the low weight it is extremely robust.

### Description

2x D40/90 incl. drill
